PROCESS HIGHLIGHTS

- Bottom-up fundamental process
- Searching for inexpensive companies, exhibiting signs of positive change
- Repeatability: Track-record has been driven by stock selection rather than macro bets
- Long-term investment horizon (typical holding period 18-36 months)
- Emerging markets weight limited to 10%

| Sector Weights | % of Portfolio | % of Benchmark | Activity Over Qtr. |

*Attribution is representative and presented on a single account in the International Equity composite and should not be considered a performance presentation. Please refer to the GIPS® Performance Presentation for detailed composite performance and disclosures. Differences in composite performance returns and attribution results may vary. Performance returns are transaction based and attribution is holdings based. Differences in accounts holding foreign securities may also be due to variances in the daily spot rates used to calculate return. Attribution is presented gross of fees and includes the reinvestment of dividends and other income but does not reflect transaction costs and the deduction of investment advisory fees. The client's return will be reduced by the advisory fees and other expenses it may incur. Past performance is no guarantee of future results.

GENERAL DISCLOSURE: Data as of June 30, 2022. Comments and general market related projections are based on information available at the time of writing and believed to be accurate; are for informational purposes only, are not intended as individual or specific advice, may not represent the opinions of the entire firm and may not be relied upon for future investing. Investors are advised to consult with their investment professional about their specific financial needs and goals before making any investment decisions. Past performance is not indicative of future results.

INTERNATIONAL INVESTING RISKS: Investments in global/international markets involve special risks not associated with U.S. markets, including greater economic, political and currency fluctuation risks, which may be even higher in emerging markets. In addition, foreign countries may have different accounting standards than those of the U.S.

HOLDINGS DISCLOSURE: The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of the portfolio's holdings. It should not be assumed that any of the securities transactions or holdings discussed were or will prove to be profitable, or that the investment recommendations or decisions made in the future will be profitable or will equal the investment performance of the securities discussed herein. A complete list of every holding's contribution to performance during the period and the methodology of the contribution to return is available by contacting TSW Marketing.

| 2021 | 14.07% | 13.69% | 11.26% | 19.64% | 17.16% | 0.35% | 14 | 10,913.27 | 23,630.26 | |

Primary Benchmark: MSCI EAFE

1. Thompson, Siegel & Walmsley LLC ("TSW") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. TSW has been independently verified for the periods January 1, 2011 through December 31, 2020.

A firm that claims compliance with the GIPS® standards must establish policies and procedures for complying with all the applicable requirements of the GIPS® standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS® standards and have been implemented on a firm-wide basis. The International Equity composite has had a performance examination for the periods January 1, 2011 through December 31, 2020. The verification and performance examination reports are available upon request.

2. TSW is an investment adviser, established in 1969, registered with the U.S. Securities and Exchange Commission, investing in domestic and international equities and fixed income securities for a broad array of clients. TSW is an indirect wholly owned subsidiary of Pandal Group and a direct wholly owned subsidiary of Pandal (USA) Inc. TSW and J O Hambro Capital Management Group are affiliated entities under our parent, Pandal Group Limited.

3. TSW's list of composite descriptions and definitions, pooled fund descriptions for limited distribution pooled funds, and broad distribution pooled funds list are available upon request.

4. TSW's policies for valuing investments, calculating performance, and preparing GIPS® Reports are available upon request.

5. The composite includes fully discretionary segregated and pooled fund portfolios greater than \$1 million managed with the International Equity strategy. The strategy mostly invests in undervalued medium to large cap international companies located, primarily, in developed markets outside the U.S. There are specific risks inherent in international/emerging markets including political and economic instability, as well as currency fluctuation and differences in accounting standards.

6. The Gross and Net performance stated above reflects the deduction of trading expenses and the reinvestment of dividends and other income. Portfolio returns are net of all foreign non-reclaimable withholding taxes. Reclaimable withholding taxes are recognized if and when received. Gross performance does not include the deduction of investment management fees. Net performance reflects investment management fees charged based on the standard fee schedule below applied to any non-fee paying portfolios in the composite and actual management fees charged for the fee paying portfolios in the composite. Starting May 1, 2011, TSW's portfolio level performance process began using a daily time-weighted, Modified Dietz, rate of return calculation, on a trade date basis using accruals for dividends and fixed income, while treating cash flows as beginning-of-day transactions. Daily performance periods are geometrically linked to create the monthly performance return.

7. TSW requests that any third-party investment management consultant provide our performance data only on a one-on-one basis. Please disclose the following: Gross performance results are presented before investment management and custodial fees. As described in TSW's Form ADV Part 2A, investment management fees for this strategy is generally billed quarterly based on the annual fee schedule.

The investment management fee schedule for an International Equity segregated account is shown below:

| | | This composite includes three pooled funds: | Advisory Fee | Expense Ratio |
|--------------------|-------|---|--------------|---------------|
| First \$25,000,000 | 0.75% | TSW International Large Cap Equity Trust | 0.75% | 0.75% |
| Next \$75,000,000 | 0.65% | TSW International Large Cap Equity Fund | 0.75% | 0.75% |
| Over \$100,000,000 | 0.50% | Transamerica International Equity Fund | 0.71% | 0.86% |

A portfolio's return will be reduced by these and other related expenses. The actual fee charged to an individual portfolio may vary from the stated schedule depending on a number of factors, including type and size.

8. The International Equity composite creation date: December 19, 1992, Inception date: December 31, 1992. All portfolios represented in this composite were valued at calendar month-end. Annual rates of return are calculated by linking the monthly returns using trade date valuation. All performance is expressed in U.S. dollars.

9. The benchmark utilized is the MSCI EAFE (Europe, Australasia, Far East) Index and is based on total return. MSCI EAFE is an equity index which captures large and mid cap representation across Developed Markets countries around the world, excluding the US and Canada. The index covers approximately 85% of the free float-adjusted market capitalization in each country. Country weight information is available upon request. The benchmark returns include interest, dividends, and other earned income, but do not include any trading expenses, management fees or any other expenses. Sources of foreign exchange rates may be different between the composite and the benchmark. The benchmark return is net of withholding taxes from a U.S. tax perspective. The benchmark returns are not covered by the report of independent verifiers.

10. Internal dispersion is calculated using the equal-weighted standard deviation of monthly gross-of-fee returns of all portfolios that were included in the composite for the full year. The statistical measurement of internal dispersion for composites with five (5) or less portfolios for the year is not considered meaningful and, accordingly, has not been presented. "n.m."="Not Meaningful." The three-year annualized ex-post standard deviation, using monthly gross-of-fee returns, measures the variability of the composite and the benchmark returns over the preceding 36-month period. It is not required to be presented when a full 36 months of composite performance is not yet available.

11. The significant cash flow policy for the International Equity composite states: Beginning January 1, 2013, portfolios with a net cash flow that exceed 25% of the beginning market value of the portfolio for the month, are removed from the composite. Portfolios are then re-included in the composite the following month.

12. Historical performance results are not indicative of the future investment performance of TSW.
